### Conditions ?

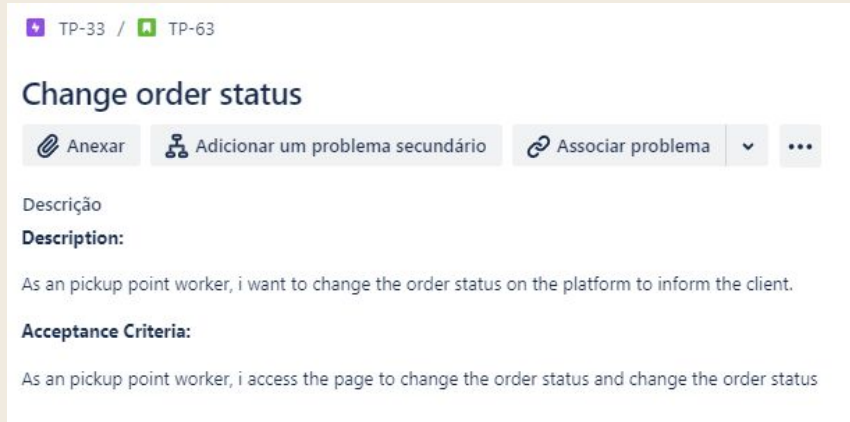

#### Conditions on New Code

Conditions on New Code apply to all branches and to Pull Requests.

Metric	Operator	Value
Coverage	is less than	80.0%
Duplicated Lines (%)	is greater than	3.0%
Maintainability Rating	is worse than	A
Reliability Rating	is worse than	A
Security Hotspots Reviewed	is less than	100%
Security Rating	is worse than	A

sonarcloud 

# SQA environment - Mapping User stories to workflow

# SQA environment - Github Workflow and code review practices

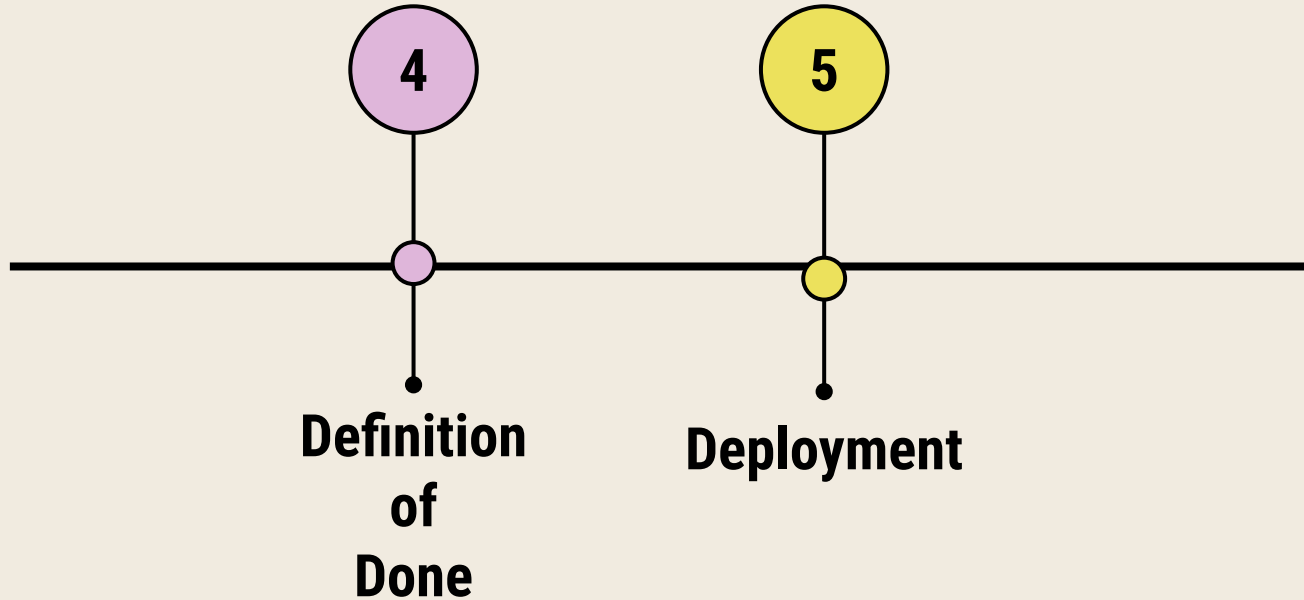

1. New task -> new branch -> explicit name;

```
TP-62-check-all-current-orders-on-each-pickup-point-and-its-details
```

2. Code changes -> committed to the local branch (frequently)
3. Initiate a pull request to request code review
4. Merge the pull Request
5. Delete the branch

# SQA environment - workflow

# SQA environment - Definition of Done

1. Fulfillment of acceptance criteria:
2. Code implementation and review:
3. Passing unit tests:
4. Successful integration tests:
5. The feature is deployed in the production environment

# SQA environment - Testing Technologies

# SQA environment - Deployment

**Front-End**

**Back-End + DB**

# Lessons Learned - TDD
